

Changing Language Settings

1. To **translate all FamilySearch pages** to another language:
 - a. On any page in FamilySearch
 - b. Click on the word English (near the bottom, to the right of the world symbol)
 - c. Click to select a language. This should translate most elements of all the pages to the desired language.
 - d. To return to English
 - i. Repeat the above steps, clicking on the name of the language near the bottom of any page, to the right of the world symbol
 - ii. Click to select English
2. To **change the template** for the **name** portion of the Vital Information section of the “Details” page (aka profile)
 - a. On the details page, in the Vital Information area, click on the name of the person
 - b. Click on “edit”
 - c. Pull down on the arrow in “Language: **Other**▼”
 - d. Click to select a language template
 - e. Note: the template for Other, English and all the languages that use the Roman alphabet is really the same. The Slavic and oriental language templates have other fields that accept the characters from those languages as needed.
